

MöllerMedical Aesthetics Solutions

Complete solutions for Body Contouring & Fat Transfer

Aesthetic Surgery Cannulas

Our Cannula Portfolio.
Are you looking for fitting
cannulas for your surgeries?

▶ We offer the right cannula for
every application.

Mercedes

360° | Medium volume | 3 ports

The all-time classic among liposuction cannulas. Developed in cooperation with Dr. Afschin Fatemi, it is particularly suitable for treatments, which require a gentle 360° multilayer harvesting.

Double Mercedes

360° | Large volume | 6 ports

Two sets of Mercedes holes in this cannula allow 360° fat aspiration and the aspiration of a larger volume in the same time.

Triple Mercedes

360° | High volume | 9 ports

Equipped with three sets of Mercedes holes this cannula is designed for large volume extraction. This arrangement allows multi-layered adipose tissue to be extracted quickly, evenly and effectively.

Rapid Extraction

360° | High volume | 9 ports

The Rapid Extraction Cannula, developed with Dr. Afschin Fatemi, offers optimal aspiration distribution across all ports of the cannula. For fast and gentle extraction of large volumes.

Multi Rapid Extraction

360° | Super high volume | 15 ports

This cannula is the right choice for debunking fat-rich tissue areas that need to be treated evenly and efficiently.

Multi-Hole

360° | Small volume | 24 ports

This cannula is ideal for harvesting fat cells for fat transplantation. It allows to removing adipose tissue in form of small and uniform lobules. Also ideal for fine sculpting and feathering.

Extraction

Candy Cane

180° | Large volume | 3 ports

Due to its very special geometry, the Candy Cane Cannula is designed for large volume fat extraction in highly fibrous tissue.

Single-Port

90° | Medium volume | Single port

The Single-Port Cannula is particularly suitable for sensitive areas. The one-sided placement of the hole offers selective and direct extraction of adipose tissue.

Tri-Port

90° | High volume | 3 ports

This cannula features 3 holes in a row to offer the precision of the Single-Port Cannula in combination with a high suction volume.

Perspiratory Gland

270° | Manual extraction | Medium volume | 9 ports

Due to the abrasive hole geometry this bended cannula, developed with Dr. Afschin Fatemi, is an effective way of removing sweat glands.

Extraction and Infiltration

Basket

360° | Super high volume | 3 ports

Designed for large volume infiltration, pre-tunnelling, harvesting and equalisation of tissue. Available in two configurations: 1.5 cannulas are flared to 1.5 of their tube diameter. 2.0 cannulas are flared to the double of their tube diameter at the basket.

Double Basket

360° | Super high volume | 6 ports

Double Basket Cannulas have an even greater throughput than the Basket Cannulas. Available as 1.5 cannula, which is flared to 1.5 of their tube diameter at the Double Basket

Removal Cannula

270° | Manual extraction | Luer-Lock | 2 ports
 Ø 2.5 mm (13G) | Length 110 mm | Single use | Sterile

Designed for manual fat removal the open tip of this cannula allows the extraction of small amounts of fatty tissue. Can be used with syringes with Luer-Lock connector. Suitable for Stem-Cell collection. * | REF 10001180

Scar Cannula - V-shaped blade

90° | Manual infiltration | Luer-Lock | Single port
 Ø 1.5 mm | (17G) | Length 66 mm | Single use | Sterile

The Scar Cannula with its V-shaped blade is especially suited for the gentle cutting of connecting tissue and the injection of fat in one operation.** | REF 10001181

Injection Cannula 1 - Straight

180° | Manual infiltration | Luer-Lock | Single port
 Ø 1.6 mm | (16G) | Length 66.5 mm | Single use | Sterile

This cannula is perfect for the precise infiltration of small amounts of fat. The specially developed tip, with a 180° opening, reduces the risk of injury to vessels and nerves in sensitive body regions.* | REF 10001182

Inject Cannula 2 - Concave

180° | Manual infiltration | Luer-Lock | Single port
 Ø 1.6 mm | (16G) | Length 73 mm | Single use | Sterile

The Injection Cannula with its concave curved shape is ideal for injecting fat into difficult to access regions. Its tip reduces the risk of injury to vessels and nerves in sensitive body regions.* | REF 10001183

Inject Cannula 3 - Convex

180° | Manual infiltration | Luer-Lock | Single port
 Ø 1.6 mm | (16G) | Length 73 mm | Single use | Sterile

This cannula is designed for optimal injecting fat into regions that are difficult to access. The tip reduces the risk of injury to vessels and nerves in sensitive body regions.* | REF 10001184

* developed in cooperation with Dr. Afschin Fatemi | ** developed in cooperation with Dr. Luiz Toledo
